SAFETY DATA SHEET
HYDROCHLORIC ACID 1M

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name HYDROCHLORIC ACID 1M
Product number 1042

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses Laboratory reagent.
Uses advised against No specific uses advised against are identified.

1.3. Details of the supplier of the safety data sheet

Supplier Reagent Chemical Services
11b - 13 Aston Fields Road
Whitehouse Industrial Estate
Runcorn
Cheshire WA7 3DL
T: 01928 716903 (08.30 - 17.00)
F: 01928 716425
E: info@reagent.co.uk

1.4. Emergency telephone number

Emergency telephone OHES Environmental Ltd 24-7
Tel. 0333 333 9939 (24 hour)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification (EC 1272/2008)

Health hazards Not Classified
Environmental hazards Not Classified

2.2. Label elements

Pictogram

Signal word Warning
Hazard statements H290 May be corrosive to metals.
Precautionary statements P234 Keep only in original container.
P406 Store in corrosive resistant container.
HYDROCHLORIC ACID 1M

Supplementary precautionary statements

P390 Absorb spillage to prevent material damage.

2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

<table>
<thead>
<tr>
<th>HYDROCHLORIC ACID ...%</th>
<th>1-5%</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAS number: 7647-01-0</td>
<td></td>

Classification

Skin Corr. 1B - H314
Eye Dam. 1 - H318
STOT SE 3 - H335

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

SECTION 4: First aid measures

4.1. Description of first aid measures

General information

Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.

Inhalation

Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.

Ingestion

Rinse mouth thoroughly with water. Remove any dentures. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.

Skin contact

Rinse with water.

Eye contact

Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Continue to rinse for at least 10 minutes.

Protection of first aiders

First aid personnel should wear appropriate protective equipment during any rescue.

4.2. Most important symptoms and effects, both acute and delayed

General information

See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

Inhalation

Prolonged inhalation of high concentrations may damage respiratory system.

Ingestion

Gastrointestinal symptoms, including upset stomach. Ingestion may cause severe irritation of the mouth, the oesophagus and the gastrointestinal tract. Nausea, vomiting.

Skin contact

May cause irritation. Prolonged contact may cause dryness of the skin.

Eye contact

May cause temporary eye irritation.
HYDROCHLORIC ACID 1M

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor
Treat symptomatically.

Specific treatments
Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media
The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Hazardous combustion products
Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours. Chlorine.

5.3. Advice for firefighters

Protective actions during firefighting
Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.

Special protective equipment for firefighters
Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions
No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material.

For emergency responders
Wear protective clothing as described in Section 8 of this safety data sheet. Wash thoroughly after dealing with a spillage.

6.2. Environmental precautions

Environmental precautions
Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

6.3. Methods and material for containment and cleaning up

3/11
HYDROCHLORIC ACID 1M

Methods for cleaning up

Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Approach the spillage from upwind. Small Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Large Spillages: If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and absorb spillage with sand, earth or other non-combustible material. Place waste in labelled, sealed containers. Clean contaminated objects and areas thoroughly, observing environmental regulations. The contaminated absorbent may pose the same hazard as the spilled material. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. The requirements of the local water authority must be complied with if contaminated water is flushed directly to the sewer. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

6.4. Reference to other sections

For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions

Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers.

Advice on general occupational hygiene

Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautions

Store away from incompatible materials (see Section 10). Store in accordance with local regulations. Store away from the following materials: Alkalis. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Bund storage facilities to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.

Storage class

Chemical storage.

7.3. Specific end use(s)

The identified uses for this product are detailed in Section 1.2.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters

Occupational exposure limits

HYDROCHLORIC ACID ...%  
Long-term exposure limit (8-hour TWA): WEL 1 ppm  2 mg/m³ gas and aerosol mists  
Short-term exposure limit (15-minute):  WEL 5 ppm  8 mg/m³ gas and aerosol mists  
WEL = Workplace Exposure Limit
HYDROCHLORIC ACID 1M

HYDROCHLORIC ACID ...% (CAS: 7647-01-0)

Workers - Inhalation; Long term local effects: 8 mg/m³
Workers - Inhalation; Short term local effects: 15 mg/m³
General population - Inhalation; Long term local effects: 8 mg/m³
General population - Inhalation; Short term local effects: 15 mg/m³

8.2. Exposure controls

Protective equipment

Appropriate engineering controls

Provide adequate ventilation. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.

Eye/face protection

Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended. It is recommended that gloves are made of the following material: Nitrile rubber. Butyl rubber. The breakthrough time for any glove material may be different for different glove manufacturers. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material.

Other skin and body protection

Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.

Hygiene measures

Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Preventive industrial medical examinations should be carried out. Warn cleaning personnel of any hazardous properties of the product.

Respiratory protection

Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140. Gas filter, type E.

Environmental exposure controls

Keep container tightly sealed when not in use.
## SECTION 9: Physical and Chemical Properties

### 9.1. Information on basic physical and chemical properties

### 9.2. Other information

Other information: None.

## SECTION 10: Stability and Reactivity

### 10.1. Reactivity

Reactivity: May be corrosive to metals. The following materials may react with the product: Alkalis. Oxidising agents.

### 10.2. Chemical stability

Stability: Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.
## HYDROCHLORIC ACID 1M

### 10.3. Possibility of hazardous reactions

**Possibility of hazardous reactions**

May generate heat. Will not polymerise.

### 10.4. Conditions to avoid

**Conditions to avoid**

Avoid excessive heat for prolonged periods of time. Avoid contact with incompatible materials stated in section 10.5.

### 10.5. Incompatible materials

**Materials to avoid**

Alkalis. Amines. Mild steel. Aluminium. May be corrosive to metals. Sulphides Cyanides

### 10.6. Hazardous decomposition products

**Hazardous decomposition products**

Does not decompose when used and stored as recommended.

### SECTION 11: Toxicological information

#### 11.1. Information on toxicological effects

**Acute toxicity - oral**

*Notes (oral LD₅₀)*

Based on available data the classification criteria are not met.

**Acute toxicity - dermal**

*Notes (dermal LD₅₀)*

Based on available data the classification criteria are not met.

**Acute toxicity - inhalation**

**Acute toxicity inhalation (LC₅₀ vapours mg/l)**

8.3

*Notes (inhalation LC₅₀)*

Based on available data the classification criteria are not met.

**Skin corrosion/irritation**

*Animal data*

Based on available data the classification criteria are not met.

**Extreme pH**

≤ 2 Corrosive.

**Serious eye damage/irritation**

*Serious eye damage/irritation*

Based on available data the classification criteria are not met.

**Respiratory sensitisation**

*Respiratory sensitisation*

Based on available data the classification criteria are not met.

**Skin sensitisation**

*Skin sensitisation*

Based on available data the classification criteria are not met.

**Germ cell mutagenicity**

*Genotoxicity - in vitro*

Based on available data the classification criteria are not met.

**Carcinogenicity**

*Carcinogenicity*

Based on available data the classification criteria are not met.

**IARC carcinogenicity**

None of the ingredients are listed or exempt.

**Reproductive toxicity**

*Reproductive toxicity - fertility*

Based on available data the classification criteria are not met.

*Reproductive toxicity - development*

Based on available data the classification criteria are not met.

**Specific target organ toxicity - single exposure**
HYDROCHLORIC ACID 1M

<table>
<thead>
<tr>
<th>STOT - single exposure</th>
<th>Not classified as a specific target organ toxicant after a single exposure.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specific target organ toxicity - repeated exposure</td>
<td></td>

<tr>
<td>STOT - repeated exposure</td>
<td>Not classified as a specific target organ toxicant after repeated exposure.</td>
</tr>
</tbody>
</table>

**Aspiration hazard**
- Based on available data the classification criteria are not met.

**General information**
- The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

**Inhalation**
- Prolonged inhalation of high concentrations may damage respiratory system.

**Ingestion**
- Gastrointestinal symptoms, including upset stomach. Nausea, vomiting. May cause irritation.

**Skin contact**
- Prolonged contact may cause dryness of the skin.

**Eye contact**
- May cause temporary eye irritation.

**Route of entry**
- Ingestion Inhalation Skin and/or eye contact

**Target organs**
- No specific target organs known.

### SECTION 12: Ecological Information

**Ecotoxicity**
- The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms.

12.1. Toxicity
- Based on available data the classification criteria are not met.

**Chronic toxicity - fish early life stage**
- Not available.

12.2. Persistence and degradability

**Persistence and degradability**
- The product contains inorganic substances which are not biodegradable.

12.3. Bioaccumulative potential

**Bioaccumulative potential**
- No data available on bioaccumulation.

**Partition coefficient**
- No specific test data are available.

12.4. Mobility in soil

**Mobility**
- The product is water-soluble and may spread in water systems. The product is non-volatile.

12.5. Results of PBT and vPvB assessment

**Results of PBT and vPvB assessment**
- This product does not contain any substances classified as PBT or vPvB.

12.6. Other adverse effects

**Other adverse effects**
- None known.

### SECTION 13: Disposal considerations

13.1. Waste treatment methods
HYDROCHLORIC ACID 1M

**General information**
The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.

**Disposal methods**
Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Incineration or landfill should only be considered when recycling is not feasible.

**SECTION 14: Transport information**

**General**
For limited quantity packaging/limited load information, consult the relevant modal documentation using the data shown in this section.

14.1. UN number
- UN No. (ADR/RID) 1789
- UN No. (IMDG) 1789
- UN No. (ICAO) 1789
- UN No. (ADN) 1789

14.2. UN proper shipping name
- Proper shipping name (ADR/RID) HYDROCHLORIC ACID
- Proper shipping name (IMDG) HYDROCHLORIC ACID
- Proper shipping name (ICAO) HYDROCHLORIC ACID
- Proper shipping name (ADN) HYDROCHLORIC ACID

14.3. Transport hazard class(es)
- ADR/RID class 8
- ADR/RID classification code C1
- IMDG label 8
- IMDG class 8
- ICAO class/division 8
- ADN class 8

**Transport labels**

14.4. Packing group
- ADR/RID packing group III
- IMDG packing group III
HYDROCHLORIC ACID 1M

ADN packing group III
ICAO packing group III

14.5. Environmental hazards
Environmentally hazardous substance/marine pollutant No.

14.6. Special precautions for user
Always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

EmS F-A, S-B
ADR transport category 3
Hazard Identification Number (ADR/RID) 80
Tunnel restriction code (E)

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture
Guidance Workplace Exposure Limits EH40.
Authorisations (Title VII Regulation 1907/2006) No specific authorisations are known for this product.
Restrictions (Title VIII Regulation 1907/2006) No specific restrictions on use are known for this product.

15.2. Chemical safety assessment
No chemical safety assessment has been carried out.

Inventories
EU - EINECS/ELINCS None of the ingredients are listed or exempt.

SECTION 16: Other information
HYDROCHLORIC ACID 1M

Abbreviations and acronyms used in the safety data sheet

ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.
ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways.
RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail.
IATA: International Air Transport Association.
IMDG: International Maritime Dangerous Goods.
CAS: Chemical Abstracts Service.
ATE: Acute Toxicity Estimate.
LC₅₀: Lethal Concentration to 50 % of a test population.
LD₅₀: Lethal Dose to 50% of a test population (Median Lethal Dose).
EC₅₀: 50% of maximal Effective Concentration.
PBT: Persistent, Bioaccumulative and Toxic substance.
vPvB: Very Persistent and Very Bioaccumulative.

EMERGENCY TELEPHONE: Emergency Telephone: +44 (0) 1928 716903 Between 08.30 - 17.00

2 HAZARDS IDENTIFICATION

Harmful if swallowed.
CLASSIFICATION (1999/45): Xn; R22.

ENVIRONMENT
Although not classified as harmful to the environment the material should not be discharged to land or water systems, this may have an impact on the organisms in the local area. The Environment Agency or other regulatory body must be informed of large or uncontrolled discharges to land or water. The product is miscible with water and will spread in water systems. Spillages may cause slippery surfaces.

PHYSICAL AND CHEMICAL HAZARDS
The product can form explosive vapour / air mixtures. Violent reaction with oxidisers, oxidising acids and sulphuric acid. Forms explosive mixture with sodium perchlorate. Incompatible with strong acids, alkalis, aliphatic amines, isocyanates, chlorosulphonic acid, oleum, potassium dichromate, phosphorous pentasulphide, sodium chlorate. Causes ignition at room temperature with chromium trioxide, potassium permanganate and sodium peroxide.

HUMAN HEALTH
The acute effects of ingesting large amounts are similar to alcohol intoxication, followed by vomiting, headache, elevated breathing and heart rate, collapse and unconsciousness. May be fatal, the lethal dose for humans is 100ml. Repeated small exposures can produce skin allergies, kidney problems and brain damage. May aggravate pre-existing skin, eye, liver, kidney or respiratory conditions.

COMPOSITION COMMENTS
A mixture comprising mainly of ethanediol with a small amount of benzotriazole. The information is based on the hazards and properties of ethanediol.

4 FIRST-AID MEASURES

GENERAL INFORMATION
CAUTION! First aid personnel must be aware of own risk during rescue! Always consider any dangers in the vicinity before approaching to treat the casualty. First aid personnel must protect themselves with all necessary personal protective equipment during the assistance of casualties. When breathing is difficult, properly trained personnel may assist the casualty by administering oxygen. Place unconscious person on the side in the recovery position and ensure breathing can take place. Never give anything by mouth to an unconscious person. If casualty needs to be resuscitated avoid mouth to mouth contact, use a mechanical device such as a bag and mask to provide artificial respiration. If medical assistance is needed take as much detail as possible about the incident and hazardous materials involved with the casualty.

INHALATION
Remove victim immediately from source of exposure. Provide rest, warmth and fresh air. Get medical attention if any discomfort continues.
INGESTION
Do not induce vomiting. Rinse mouth thoroughly with plenty of water. Get medical attention immediately!

SKIN CONTACT
Immediately remove contaminated clothing and wash before re-use. Wash the skin immediately with soap and water. In serious cases or if discomfort continues obtain medical attention.

EYE CONTACT
Promptly wash eyes with plenty of water or eye wash solution while lifting the eyelids. If possible remove any contact lenses and continue to wash. Get medical attention.

5 FIRE-FIGHTING MEASURES

EXTINGUISHING MEDIA
The product is not classed as flammable but would be combustible in the event of a fire. It would form explosive vapour / air mixtures. Water spray, dry powder, carbon dioxide or alcohol resistant foam. Do not use water jet.

SPECIAL FIRE FIGHTING PROCEDURES
Prevent run-off from entering drains and watercourses. Containers close to the fire area should be cooled with water if safe to do so. Be aware that any flammable substance containers are liable to explode when heated.

SPECIFIC HAZARDS
In case of fire, toxic fumes or vapours may be formed. Carbon monoxide (CO). Carbon dioxide (CO2). Oxides of nitrogen.

PROTECTIVE MEASURES IN FIRE
Self contained breathing apparatus and full protective clothing must be worn in case of fire.

6 ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS
Wear protective clothing as described in Section 8 of this safety data sheet. Avoid inhalation of vapours and contact with skin and eyes.

ENVIRONMENTAL PRECAUTIONS
Avoid unauthorised discharge to the environment. Clean up any spillages immediately, prevent material from spreading and entering drains or sewage systems. If the product has entered a foul drain or sewage system in significant amounts to cause a hazard then the local water treatment company must be informed. Large spillages or uncontrolled discharge to water systems must be alerted to the Environmental Agency or other regulatory body. If spillages to land cannot be treated safely or if contamination will occur the Environment Agency must be alerted immediately.

SPILL CLEAN UP METHODS
Remove ignition sources when treating spillages, no smoking. Small Spillages: Absorb with sand or other inert absorbent. Large Spillages: Damp and absorb spillages with sand, earth or other inert, non-combustible material. Collect spillage in containers, seal securely and deliver for disposal according to local regulations. Containers with collected spillage must be properly labelled with correct contents and hazard symbol. Wash spillage site well with water and detergent, be aware of the potential for surfaces to become slippery. Ventilate area and allow to dry before allowing access. Wash thoroughly after dealing with a spillage.

7 HANDLING AND STORAGE

USAGE PRECAUTIONS
Avoid ingestion of the product, inhalation of any vapours/mists when produced and contact with skin and eyes.

STORAGE PRECAUTIONS
Store in closed original container at temperatures between 5°C and 30°C. Store away from heat, direct sunlight and moisture. Avoid sources of ignition. Store away from incompatible materials. Store in a stable situation to avoid spillages. It is advisable to store in a bunded area or use other protective measures such as a sump pallet or storage tray.

STORAGE CLASS
Chemical storage.

8 EXPOSURE CONTROLS/PERSONAL PROTECTION

<table>
<thead>
<tr>
<th>Name</th>
<th>STD</th>
<th>TWA - 8 Hrs</th>
<th>STEL - 15 Min</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>ETHANEDIOL</td>
<td>WEL</td>
<td>52 mg/m3(Sk)</td>
<td>104 mg/m3(Sk)</td>
<td></td>
</tr>
</tbody>
</table>

WEL = Workplace Exposure Limit.

ENGINEERING MEASURES
The mixture is non-volatile and will not require any engineering measures under normal use. However if sprays or mists are generated then use appropriate ventilation and extraction to avoid occupational exposure.

RESPIRATORY EQUIPMENT
Not generally required but if excessive amounts of vapours, mists or sprays are generated wear suitable respiratory equipment when there is insufficient ventilation or extraction. Consult with the supplier as to the compatibility of the equipment with the chemical of concern.

CAUTION: Air purifying respirators do not protect the user in oxygen deficient atmospheres, use air supplied system.
HAND PROTECTION
Wear protective gloves. Be aware that the liquid may penetrate the gloves. Frequent change is advisable. The most suitable glove must be chosen in consultation with the gloves supplier, who can inform about the breakthrough time of the glove material.

EYE PROTECTION
Wear approved safety goggles.

OTHER PROTECTION
Wear suitable protective clothing as protection against splashing or contamination. Have facilities in place to wash eyes in case of contact. If handling large amounts it is recommended to have a safety shower. Wear rubber apron and full length gloves if handling large amounts. If there is a risk of splashing then wear a face shield.

HYGIENE MEASURES
Wash at the end of each work shift and before eating, smoking and using the toilet. Wash promptly if skin becomes wet or contaminated. Promptly remove any clothing that becomes wet or contaminated. When using do not eat, drink or smoke.

### 10 STABILITY AND REACTIVITY

STABILITY
Stable under normal temperatures and prescribed storage conditions.

CONDITIONS TO AVOID
Avoid direct sunlight and moisture. Avoid extremes of temperatures. Avoid storage with incompatible materials. Avoid flames and other high energy sources of ignition.

HAZARDOUS POLYMERISATION
Will not polymerise.

MATERIALS TO AVOID

HAZARDOUS DECOMPOSITION PRODUCTS
Carbon monoxide (CO). Carbon dioxide (CO2). May form nitrogen oxides in small amounts.

### 11 TOXICOLOGICAL INFORMATION

INHALATION
Vapours or mists in high concentration may irritate the respiratory system and be harmful. In high concentrations vapours may cause nausea, headache and dizziness.

INGESTION
Harmful if swallowed. Ingestion of large amounts may cause unconsciousness and can be fatal.

SKIN CONTACT
The product can exaggerate existing skin conditions in sensitive individuals.

EYE CONTACT
May irritate the eyes, especially people with pre-existing conditions.

TARGET ORGANS
Repeated exposure can effect the: Liver Kidneys Brain

MEDICAL SYMPTOMS
The initial effects of ingestion are similar to alcohol consumption followed by nausea, vomiting, abdominal pain, muscle weakness and collapse. If not treated death can occur between 8 and 24 hours.
SPECIFIC EFFECTS
Exposure to alcohol can increase the toxic effects.

12 ECOLOGICAL INFORMATION

ECOTOXICITY
Although not classified as environmentally hazardous, harmful effects cannot be excluded in the event of improper handling or disposal. The product contains a substance which is harmful to aquatic organisms and which may cause long term adverse effects in the aquatic environment. Do not allow to enter drinking water, waste water or soil.

LC 50, 96 Hrs, FISH mg/l Oncorhynchus mykiss (Rainbow trout) - 18, 500 (Ethanediol)

MOBILITY
The product will be absorbed into the soil and is expected to evaporate slowly. It will travel into groundwater when large amounts remain in contact with the soil or through continual discharge. The product is miscible with water and mobile in water systems. It will spread in the aquatic environment and travel through groundwater.

BIOACCUMULATION
Low bioaccumulation potential.

DEGRADABILITY
The product is biodegradable. In water and air the product is expected to have a half-life of between 1 and 10 days.

13 DISPOSAL CONSIDERATIONS

GENERAL INFORMATION
Any waste material is classed as hazardous waste, it should only be disposed of through licenced waste handlers and treatment sites. Do not allow unauthorised disposal to the environment. If operators are exposed to vapours during the disposal process then suitable respiratory protection should be worn. All other personal protective equipment as described in section 8 should be worn.

DISPOSAL METHODS
Dispose of waste and residues in accordance with local authority requirements. Avoid unauthorised disposal. Do not dump illegally onto land or into water. Respiratory protection should be worn if disposal methods are producing vapours and there is insufficient extraction or ventilation.

14 TRANSPORT INFORMATION

GENERAL
The product is not covered by international regulation on the transport of dangerous goods (IMDG, IATA, ADR/RID).

No transport warning sign required.

ENVIRONMENTALLY HAZARDOUS SUBSTANCE/MARINE POLLUTANT

15 REGULATORY INFORMATION

LABELLING

CONTAINS
ETHANEDIOL

RISK PHRASES
R22 Harmful if swallowed.

SAFETY PHRASES
S46 If swallowed, seek medical advice immediately and show this container or label.
