SAFETY DATA SHEET
ACETONE LRG

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Product name ACETONE LRG
Product number 1195
REACH registration number 01-2119471330-49-XXXX
CAS number 67-64-1
EU index number 606-001-00-8
EC number 200-662-2

1.2. Relevant identified uses of the substance or mixture and uses advised against
Identified uses Solvent. Laboratory reagent.
Uses advised against Use only for intended applications.

1.3. Details of the supplier of the safety data sheet
Supplier
Reagent Chemical Services
18 Aston Fields Road
Whitehouse Industrial Estate
Runcorn
Cheshire WA7 3DL

T: 01928 716903 (08.30 - 17.00)
F: 01928 716425
E: info@reagent.co.uk

1.4. Emergency telephone number
Emergency telephone OHES Environmental Ltd 24-7
Tel. 0333 333 9939 (24 hour)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
Classification (EC 1272/2008)
Physical hazards Flam. Liq. 2 - H225
Health hazards Eye Irrit. 2 - H319 STOT SE 3 - H336
Environmental hazards Not Classified

2.2. Label elements
EC number 200-662-2
ACETONE LRG

Pictogram

[Image of pictograms]

Signal word

Danger

Hazard statements

H225 Highly flammable liquid and vapour.
H319 Causes serious eye irritation.
H336 May cause drowsiness or dizziness.

Precautionary statements

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P313 Get medical advice/ attention.
P501 Dispose of contents / container to hazardous waste depot.
P261 Avoid breathing mist/vapours/spray

Supplementary precautionary statements

P233 Keep container tightly closed.
P240 Ground/ bond container and receiving equipment.
P241 Use explosion-proof electrical/ ventilating/lighting/. . ./ equipment.
P242 Use only non-sparking tools.
P243 Take precautionary measures against static discharge.
P264 Wash . . . thoroughly after handling.
P271 Use only outdoors or in a well-ventilated area.
P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower.
P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P312 Call a POISON CENTER/ doctor if you feel unwell.
P337 If eye irritation persists:
P370+P378 In case of fire: Use . . . for extinction.
P403+P233 Store in a well-ventilated place. Keep container tightly closed.
P403+P235 Store in a well-ventilated place. Keep cool.
P405 Store locked up.

2.3. Other hazards

This substance is not classified as PBT or vPvB according to current EU criteria.

SECTION 3: Composition/information on ingredients

3.1. Substances

Product name

ACETONE LRG

REACH registration number

01-2119471330-49-XXXX

EU Index number

606-001-00-8

CAS number

67-64-1

EC number

200-662-2

SECTION 4: First aid measures

4.1. Description of first aid measures

General information

Remove affected person from source of contamination. Keep affected person away from heat, sparks and flames.
ACETONE LRG

Inhalation
Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Get medical advice/attention if you feel unwell.

Ingestion
Never give anything by mouth to an unconscious person. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Rinse mouth thoroughly with water. Get medical attention.

Skin contact
Remove contaminated clothing immediately and wash skin with soap and water. Care should be taken to avoid contact with contaminants when removing contaminated clothing. Get medical attention if irritation persists after washing.

Eye contact
Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Do not rub eye. Get medical attention if irritation persists after washing.

Protection of first aiders
First aid personnel should wear appropriate protective equipment during any rescue. If it is suspected that airborne contaminants are still present around the affected person, first aid personnel should wear an appropriate respirator or self-contained breathing apparatus.

4.2. Most important symptoms and effects, both acute and delayed

General information
The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

Inhalation
Vapours may cause headache, fatigue, dizziness and nausea. May cause respiratory irritation.

Ingestion
Prolonged or repeated exposure may cause the following adverse effects: Nausea, vomiting. Fatigue. Intoxication.

Skin contact
Prolonged or repeated exposure may cause the following adverse effects: Skin irritation. Redness. Dry skin.

Eye contact
Causes serious eye irritation. Profuse watering of the eyes. Irritation and redness, followed by blurred vision.

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor
Treat symptomatically.

Specific treatments
No specific chemical antidote is known to be required after exposure to this product.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media
Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog.

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Specific hazards
The product is highly flammable. Vapours are heavier than air and may spread near ground and travel a considerable distance to a source of ignition and flash back. Containers can burst violently or explode when heated, due to excessive pressure build-up.

Hazardous combustion products
Carbon monoxide (CO). Carbon dioxide (CO2).

5.3. Advice for firefighters
ACETONE LRG

Protective actions during firefighting
Fight fire from safe distance or protected location. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Control run-off water by containing and keeping it out of sewers and watercourses.

Special protective equipment for firefighters
Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Wear chemical protective suit.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions
Wear protective clothing as described in Section 8 of this safety data sheet. No smoking, sparks, flames or other sources of ignition near spillage. Take precautionary measures against static discharges. Avoid inhalation of vapours and contact with skin and eyes. Treat the spilled material according to the instructions in the clean-up section. Wash thoroughly after dealing with a spillage.

For emergency responders
Wear protective clothing as described in Section 8 of this safety data sheet. Treat the spilled material according to the instructions in the clean-up section. Wash thoroughly after dealing with a spillage.

6.2. Environmental precautions

Environmental precautions
To prevent release, place container with damaged side up. Do not discharge into drains or watercourses or onto the ground. Use appropriate containment to avoid environmental contamination.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up
Wear protective clothing as described in Section 8 of this safety data sheet. Stop leak if safe to do so. No smoking, sparks, flames or other sources of ignition near spillage. Small Spillages: Absorb small quantities with paper towels and evaporate in a safe place. Large Spillages: To prevent release, place container with damaged side up. Contain and absorb spillage with sand, earth or other non-combustible material. Collect and place in suitable waste disposal containers and seal securely. Containers with collected spillage must be properly labelled with correct contents and hazard symbol. For waste disposal, see Section 13. Wash thoroughly after dealing with a spillage.

6.4. Reference to other sections

Reference to other sections
For personal protection, see Section 8. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions
Do not handle until all safety precautions have been read and understood. Avoid inhalation of vapours and contact with skin and eyes. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Earth container and transfer equipment to eliminate sparks from static electricity. Use explosion-proof electrical, ventilating and lighting equipment.

Advice on general occupational hygiene
Do not eat, drink or smoke when using this product. Good personal hygiene procedures should be implemented. Clean equipment and the work area every day. Take off immediately all contaminated clothing and wash it before reuse. Care should be taken to avoid contact with contaminants when removing contaminated clothing.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautions
Store in tightly-closed, original container in a dry, cool and well-ventilated place. Keep away from oxidising materials, heat and flames. Earth container and transfer equipment to eliminate sparks from static electricity. Store away from incompatible materials (see Section 10).
ACETONE LRG

Storage class
Flammable liquid storage.

7.3. Specific end use(s)
Specific end use(s)
The identified uses for this product are detailed in Section 1.2.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters

Occupational exposure limits
Long-term exposure limit (8-hour TWA): WEL 500 ppm  1210 mg/m³
Short-term exposure limit (15-minute):  WEL 1500 ppm  3620 mg/m³
WEL = Workplace Exposure Limit

DNEL
Industry - Inhalation; Short term systemic effects: 1210 mg/m³
Industry - Inhalation; Short term local effects: 2420 mg/m³
Industry - Dermal; Long term systemic effects: 186 mg/kg Industry - Dermal; Long term systemic effects 22 mg/kg/day
General population - Inhalation; Long term systemic effects: 200 mg/m³
General population - Dermal; Long term systemic effects: 62 mg/kg
General population - Oral; Long term systemic effects: 62 mg/kg

PNEC
- Fresh water;  10.6 mg/l
- Marine water;  1.06 mg/l
- Intermittent release;  21 mg/l
- STP;  100 mg/l
- Sediment (Freshwater);  30.4 mg/kg
- Sediment (Marine water);  3.04 mg/kg
- Soil;  29.5 mg/kg

8.2. Exposure controls

Protective equipment

Provide adequate general and local exhaust ventilation. Use explosion-proof general and local exhaust ventilation.

Eye/face protection
Wear tight-fitting, chemical splash goggles or face shield. Personal protective equipment for eye and face protection should comply with European Standard EN166. If inhalation hazards exist, a full-face respirator may be required instead.

Hand protection
Wear protective gloves. Frequent changes are recommended. To protect hands from chemicals, gloves should comply with European Standard EN374. For exposure up to 8 hours, wear gloves made of the following material: Butyl rubber. Thickness: ~ 0.5 mm The breakthrough time for any glove material may be different for different glove manufacturers. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material.

Other skin and body protection
Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible. For the greatest protection, clothing should include anti-static overalls, boots and gloves. Wear suitable protective clothing made of the following material: Butyl rubber.
ACETONE LRG

Hygiene measures
Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.

Respiratory protection
Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Respirator selection must be based on exposure levels, the hazards of the product and the safe working limits of the selected respirator. Ensure all respiratory protective equipment is suitable for its intended use and is ‘CE’-marked. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140. Check that the respirator fits tightly and the filter is changed regularly. Wear a respirator fitted with the following cartridge: Organic vapour filter. Gas filter, type AX.

Environmental exposure controls
Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

SECTION 9: Physical and Chemical Properties

SECTION 10: Stability and reactivity

10.1. Reactivity
Reactivity
Reactions with the following materials may cause explosions: Strong acids. Strong alkalis. Strong oxidising agents.

10.2. Chemical stability
Stability
Stable at normal ambient temperatures and when used as recommended.

10.3. Possibility of hazardous reactions
Possibility of hazardous reactions
May generate heat. Will not polymerise.

10.4. Conditions to avoid
Conditions to avoid
Avoid heat, flames and other sources of ignition. Static electricity and formation of sparks must be prevented.

10.5. Incompatible materials
Materials to avoid
Avoid contact with acids. Avoid contact with alkalis. Avoid contact with strong oxidising agents.

10.6. Hazardous decomposition products
Hazardous decomposition products
Does not decompose when used and stored as recommended.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity - oral
Acute toxicity oral (LD₅₀ mg/kg)  5,800.0
Species  Rat
Notes (oral LD₅₀)  REACH dossier information.
ATE oral (mg/kg)  5,800.0

Acute toxicity - dermal
Acute toxicity dermal (LD₅₀ mg/kg)  15,800.0
Species  Rabbit
Notes (dermal LD₅₀)  REACH dossier information.
ATE dermal (mg/kg)  15,800.0

Acute toxicity - inhalation
Acute toxicity inhalation (LC₅₀ vapours mg/l)  76.0
Species  Rat
ATE inhalation (vapours mg/l)  76.0
Skin corrosion/irritation
ACETONE LRG

Skin corrosion/irritation
Based on available data the classification criteria are not met.

Serious eye damage/irritation
Causes eye irritation. REACH dossier information.

Respiratory sensitisation
Based on available data the classification criteria are not met.

Skin sensitisation
Guinea pig maximization test (GPMT) - Guinea pig: Not sensitising.

Genotoxicity - in vitro
Bacterial reverse mutation test: Negative., With and without metabolic activation.

Genotoxicity - in vivo
Chromosome aberration: Negative.

Carcinogenicity
Based on available data the classification criteria are not met.

Reproductive toxicity
Reproductive toxicity - fertility - LOAEL 10000 mg/l, Oral, Rat P
Reproductive toxicity - development
Maternal toxicity: - LOAEC: 11000 mg/l, Inhalation, Rat

Specific target organ toxicity - single exposure
STOT - single exposure
Vapours may cause drowsiness and dizziness.
Target organs
Eyes Respiratory system, lungs Brain

Specific target organ toxicity - repeated exposure
STOT - repeated exposure
NOAEL 900 mg/kg, Oral, Rat
Target organs
Kidneys Respiratory and haematopoietic systems Reproductive organs

Aspiration hazard
Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

General information
Prolonged and repeated contact with solvents over a long period may lead to permanent health problems.

Inhalation
Gas or vapour in high concentrations may irritate the respiratory system. Symptoms following overexposure may include the following: Headache. Fatigue. Nausea, vomiting. Vapours may cause drowsiness and dizziness.

Ingestion
Gastrointestinal symptoms, including upset stomach. May cause stomach pain or vomiting. May cause nausea, headache, dizziness and intoxication.

Skin contact
Prolonged or repeated exposure may cause the following adverse effects: Irritating to skin. Dry skin.

Eye contact
Irritating to eyes. Symptoms following overexposure may include the following: Corneal damage.

Route of entry
Inhalation Oral Skin and/or eye contact
Target organs
Eyes Respiratory system, lungs

SECTION 12: Ecological Information
ACETONE LRG

Ecotoxicity

The product is not expected to be hazardous to the environment. However, large or frequent spills may have hazardous effects on the environment.

12.1. Toxicity

Toxicity

REACH dossier information.

Acute toxicity - fish

LC50, 96 hours: 5540 mg/l, Onchorhynchus mykiss (Rainbow trout)

Acute toxicity - aquatic invertebrates

EC₅₀, 48 hours: 12600 mg/l, Daphnia magna

Acute toxicity - aquatic plants

NOEC, 192 hours: 530 mg/l, Freshwater algae

Acute toxicity - microorganisms

NOEC, 30 minutes: 1000 mg/l, Activated sludge

Acute toxicity - terrestrial

LC₅₀, 48 hours: 0.1 - 1.0 mg/cm², Eisenia Fetida (Earthworm)

Chronic toxicity - fish early life stage

Not relevant.

Short term toxicity - embryo and sac fry stages

Not available.

Chronic toxicity - aquatic invertebrates

NOEC, 21 days: 79 mg/l, Daphnia magna

NOEC, 28 days: 2212 mg/l, Daphnia magna

Toxicity to soil

Scientifically unjustified.

Toxicity to terrestrial plants

Scientifically unjustified.

12.2. Persistence and degradability

Persistence and degradability

The product is more than 80% biodegradable.

Phototransformation

Air - Degradation (%): 18.6 - 114.4 days

Stability (hydrolysis)

Scientifically unjustified.

Biodegradation

The substance is readily biodegradable.

- Degradation (%): 91: 28 days

Biological oxygen demand

~ 1.85 g O₂/g substance

Chemical oxygen demand

~ 1.92 g O₂/g substance

12.3. Bioaccumulative potential

Bioaccumulative potential

The product is not bioaccumulating. BCF: 3, REACH dossier information.

Partition coefficient

log Pow: -0.24

12.4. Mobility in soil

Mobility

The product contains volatile organic compounds (VOCs) which will evaporate easily from all surfaces.

Adsorption/desorption coefficient

No specific test data are available.

Henry's law constant

~ 2.93 Pa m3/mol @ 25°C

Surface tension

~ 23.3 mN/m @ 20°C

12.5. Results of PBT and vPvB assessment
ACETONE LRG

Results of PBT and vPvB assessment
This substance is not classified as PBT or vPvB according to current EU criteria.

12.6. Other adverse effects
Other adverse effects
None known.

SECTION 13: Disposal considerations

13.1. Waste treatment methods
General information
When handling waste, the safety precautions applying to handling of the product should be considered. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor.

Disposal methods
Reuse or recycle products wherever possible. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

SECTION 14: Transport information

General
For limited quantity packaging/limited load information, consult the relevant modal documentation using the data shown in this section.

14.1. UN number
UN No. (ADR/RID) 1090
UN No. (IMDG) 1090
UN No. (ICAO) 1090
UN No. (ADN) 1090

14.2. UN proper shipping name
Proper shipping name (ADR/RID) ACETONE
Proper shipping name (IMDG) ACETONE
Proper shipping name (ICAO) ACETONE
Proper shipping name (ADN) ACETONE

14.3. Transport hazard class(es)
ADR/RID class 3
ADR/RID classification code F1
ADR/RID label 3
IMDG class 3
ICAO class/division 3
ADN class 3

Transport labels

14.4. Packing group
ADR/RID packing group II

10/12
ACETONE LRG

IMDG packing group  II
ADN packing group  II
ICAO packing group  II

14.5. Environmental hazards
Environmentally hazardous substance/marine pollutant
No.

14.6. Special precautions for user
Always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

EmS  F-E, S-D
ADR transport category  2
Emergency Action Code  2YE
Hazard Identification Number (ADR/RID)  33
Tunnel restriction code (D/E)

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations

EU legislation

Guidance
Workplace Exposure Limits EH40.

Authorisations (Title VII Regulation 1907/2006)
No specific authorisations are known for this product.

Restrictions (Title VIII Regulation 1907/2006)
No specific restrictions on use are known for this product.

15.2. Chemical safety assessment
A chemical safety assessment has been carried out.

Inventories
EU - EINECS/ELINCS
All the ingredients are listed or exempt.
