HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

Physicochemical
Can supply oxygen in the event of a fire due to the breakdown of hydrogen peroxide. May be corrosive to metals

2.2. Label elements
Pictogram

Signal word
Warning

Hazard statements
H319 Causes serious eye irritation.

Precautionary statements
P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313 If eye irritation persists: Get medical advice/ attention.

Supplementary precautionary statements
P264 Wash contaminated skin thoroughly after handling.

2.3. Other hazards
This substance is not classified as PBT or vPvB according to current EU criteria.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

<table>
<thead>
<tr>
<th>HYDROGEN PEROXIDE SOLUTION ... %</th>

Classification (67/548/EEC or 1999/45/EC)
R5 O;R8 C;R35 Xn;R20/22

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

SECTION 4: First aid measures

4.1. Description of first aid measures

General information
CAUTION! First aid personnel must be aware of own risk during rescue! Always consider any dangers in the vicinity before approaching to treat the casualty. First aid personnel must protect themselves with all necessary personal protective equipment during the assistance of casualties. When breathing is difficult, properly trained personnel may assist the casualty by administering oxygen. Check airway for any blockages. Place unconscious person on the side in the recovery position and ensure breathing can take place. Never give anything by mouth to an unconscious person. If medical assistance is needed take as much detail as possible about the incident and hazardous materials involved with the casualty.

Inhalation
Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. In case of severe exposure or if any discomfort continues get medical attention.
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

Ingestion
Do not induce vomiting. Rinse mouth thoroughly with plenty of water. Get medical attention immediately.

Skin contact
Remove footwear if contaminated. Immediately remove contaminated clothing and wash before re-use. Rinse immediately with plenty of water. After contact with small amounts get medical attention if any discomfort continues. For large amounts, obtain medical attention.

Eye contact
Promptly wash eyes with plenty of water or eye wash solution while lifting the eyelids. If possible remove any contact lenses and continue to wash. Get medical attention immediately.

4.2. Most important symptoms and effects, both acute and delayed
General information
The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

Inhalation
High concentrations of vapours may irritate the respiratory system. Coughing.

Ingestion
Nausea, vomiting. Irritation of the mouth, throat, oesophagus and gastrointestinal tract.

Skin contact
Bleaching of the skin May irritate the skin.

Eye contact
Causes irritation of the eyes. Possible corneal damage. May cause conjunctivitis Lachrymation.

4.3. Indication of any immediate medical attention and special treatment needed
Notes for the doctor
Cases of eye contact and ingestion should be treated immediately. Have facilities in place to wash skin and eyes in case of exposure.

SECTION 5: Firefighting measures

5.1. Extinguishing media
Suitable extinguishing media
The product is non-combustible. Use fire-extinguishing media suitable for the surrounding fire. Water spray, foam, dry powder or carbon dioxide.

Unsuitable extinguishing media
Do not use water jet as this can spread the fire. Do not use carbon dioxide in enclosed spaces with insufficient ventilation.

5.2. Special hazards arising from the substance or mixture
Specific hazards
The mixture contains hydrogen peroxide which will promote the spread of fire by the supply of oxygen. Product containers can melt in the heat of a fire. Packaging materials will be combustible and provide fuel for the fire.

Hazardous combustion products
The product in its normal state is not classed as combustible. In the heat of a fire it can produce: Oxygen.

5.3. Advice for firefighters
Protective actions during firefighting
Prevent run-off from entering drains and watercourses. Use water spray to cool unopened containers. Evacuate and keep non-emergency personnel away from the fire area until it is properly extinguished with no danger of re-ignition.

Special protective equipment for firefighters
Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

**Personal precautions**

Have emergency procedures in place for treating spillages, evacuating the area and informing the emergency services if necessary. Restrict access to the area until the spillage is treated, if large amounts of vapours are produced that will be hazardous to others, evacuate the area. When any other effects of spillages will affect the safety of others the area should be evacuated. Avoid ingestion, inhalation of vapours and contact with skin and eyes. Spill control personnel should wear personal protective clothing and equipment as described in section 8 of this datasheet. Non-emergency personnel should be kept away from the area of spillage.

**6.2. Environmental precautions**

**Environmental precautions**

Avoid unauthorised discharge to the environment. Clean up any spillages immediately, prevent material from spreading and entering drains or sewage systems. Large spillages or uncontrolled discharge to water systems must be alerted to the Environmental Agency or other regulatory body. If spillages to land cannot be treated safely or if contamination will occur the Environment Agency must be alerted immediately. If the product has entered a foul drain or sewage system in significant amounts to cause a hazard then the local water treatment company must be informed.

**6.3. Methods and material for containment and cleaning up**

**Methods for cleaning up**

Small quantities (< 0.5L) can be flushed to drain with lots of water. OR Small spillages should be absorbed with an inert, non-combustible absorbent. Large Spillages: Dam and absorb spillages with sand, earth or other inert material. Fit drain covers where they are available if the spillage is likely to enter the drainage system. Collect and place in suitable waste disposal containers and seal securely. For waste disposal, see Section 13. Containers with collected spillage must be properly labelled with correct contents and hazard symbol. Flush contaminated area with plenty of water. Take care as floors and other surfaces may become slippery. Ventilate area and allow to dry before allowing access. Wash thoroughly after dealing with a spillage.

**6.4. Reference to other sections**

**Reference to other sections**

Refer to sections 8 and 13 for additional information.

**SECTION 7: Handling and storage**

**7.1. Precautions for safe handling**

**Usage precautions**

Avoid spilling the product. Avoid ingestion of the product, inhalation of any vapours/mists when produced and contact with skin and eyes. Do not eat, drink or smoke when handling. Wash at the end of each work shift, before eating, drinking, smoking and using the toilet. Do not mix with incompatible substances or mixtures. Remove contaminated clothing/footwear/equipment before entering eating areas or places that would expose others to the product. Do not use in areas close to drainage systems unless measures are in place to prevent access of product. Ensure emergency procedures are in place to treat spillages and cope with other situations such as evacuation. Provide eye washing and skin washing facilities, when handling large amounts a safety shower is recommended.

**7.2. Conditions for safe storage, including any incompatibilities**

**Storage precautions**

Store in closed original container at temperatures between 5°C and 25°C. If the product is transferred to another container, this should be made of a compatible material that will not be affected preferably plastic or glass. Do not use metal containers. The packaging manufacturer will advise on suitable packaging. Store away from heat, direct sunlight and moisture. Store in a stable situation to avoid spillages. It is advisable to store in a bunded area or use other protective measures such as a sump pallet or storage tray.

**Storage class**

Chemical storage.

**7.3. Specific end use(s)**
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

Specific end use(s)  
The identified uses for this product are detailed in Section 1.2. Registered uses can be found on the ECHA website under Registered Substances.

Usage description  
Use product under conditions described in this datasheet. Avoid exposure of operators and others who may be affected by its use. Avoid overuse of the product which would create waste and potential spillages. Always use recommended personal protective equipment. Only use the product for its intended use in a safe manner, do not use for other purposes.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters

Occupational exposure limits
HYDROGEN PEROXIDE SOLUTION ... %

Long-term exposure limit (8-hour TWA): WEL 1 ppm 1.4 mg/m³
Short-term exposure limit (15-minute): WEL 2 ppm 2.8 mg/m³

WEL = Workplace Exposure Limit

DNEL  
- Industry - Inhalation; Short term local effects: 3 mg/m³
- Industry - Inhalation; Long term local effects: 1.4 mg/m³
- Consumer - Inhalation; Short term local effects: 1.93 mg/m³
- Consumer - Inhalation; Long term local effects: 0.21 mg/m³

PNEC  
- Fresh water; 0.0126 mg/l
- Marine water; 0.0126 mg/l
- Intermittent release; 0.0138 mg/l
- STP; 4.66 mg/l
- Sediment (Freshwater); 0.047 mg/kg
- Sediment (Marinewater); 0.047 mg/kg
- Soil; 0.0023 mg/kg

8.2. Exposure controls

Protective equipment  
The mixture is non-volatile however provide adequate ventilation and appropriate extraction when vapours or sprays are produced to avoid personal exposure. Provide adequate general and local exhaust ventilation.

Eye/face protection  
Wear approved chemical safety goggles conforming to EN 166.

Hand protection  
Wear protective gloves. Butyl rubber. Rubber (natural, latex). Nitrile rubber. Polyvinyl chloride (PVC). Be aware that latex gloves can produce an allergic reaction in sensitive individuals. For gloves involving total immersion 1.0mm thickness (if available) are recommended, at least 0.5mm and breakthrough time of >480 minutes. For splash resistance use minimum 0.5mm thickness and breakthrough time > 240 minutes. Gloves should have a breakthrough time sufficient for the amount of handling but allow dexterity for safe movement and handling. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. Gloves showing signs of degradation should be changed to avoid skin contamination. It should be noted that liquid may penetrate the gloves. Frequent changes are recommended. Gloves should carry the CE mark and conform to BS EN 374, chemicals and micro-organisms. When removing used gloves apply proper technique by avoiding skin contact with the outer surface. When packages of the product are being handled during storage or transport it is advisable to wear protective gloves to prevent damage to the skin.
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

Other skin and body protection
Wear suitable protective clothing during transport, handling and storage operations connected with the product. Protective clothing should conform to the general requirements of EN 340:2003. Also consider EN 13034:2005; EN 14605:2005; EN 943:2002 dependent upon the situation resulting in exposure. Wear suitable protective footwear during handling of the product. When treating spillages it is recommended to wear protective boots, consult with the supplier as to the compatibility. Safety footwear should conform to standards EN 344 - 347. Wear rubber or plastic apron and full length gauntlets if handling large amounts. If there is a risk of splashing then wear a face shield. Have facilities in place to wash eyes in case of contact. If handling large amounts it is recommended to have a safety shower.

Hygiene measures
Any fume extraction equipment should be maintained according to the COSHH Regulations and serviced by a competent person within a fourteen month period. Remove clothing when contamination will result in exposure to the substance, segregate and wash before re-use. Do not eat, drink or smoke in the work area. Wash at the end of each work shift and before eating, smoking and using the toilet. Remove contaminated clothing when entering eating areas or other places that could lead to contamination of others with the product.

Respiratory protection
Wear suitable respiratory protection when vapours or mists are produced if the Workplace Exposure Limit is exceeded and there is insufficient ventilation or extraction. Respirator must be fitted with a cartridge suitable for the chemical of concern. Consult with the supplier as to the compatibility of the equipment with the chemical of concern. Respiratory protection should conform to the following standards. BS EN 140: Half-face masks. BS EN 136: Full face masks. CAUTION: Air purifying respirators do not protect the user in oxygen deficient atmospheres, use air supplied system. Powered air respirators should meet requirements of EN146 and EN12941. Airline fed respirators should meet the requirements of EN 270 and EN1835. Respiratory protection should be maintained in a proper condition and inspected at the frequency specified by current legislation.

Environmental exposure controls
See section 6 for details.

SECTION 9: Physical and Chemical Properties

9.1. Information on basic physical and chemical properties

Appearance
Liquid.

Colour
Colourless.

Odour
Odourless.

Odour threshold
No information available. No information available.

pH
pH (concentrated solution): Approx. 3 - 4 pH (diluted solution): 6 @ 21°C 0.35%

Flash point
Scientifically unjustified.

Evaporation rate
No information available.

Evaporation factor
No information available.

Flammability (solid, gas)
Not applicable.

Upper/lower flammability or explosive limits
Scientifically unjustified.

Vapour density
No information available.

Bulk density
Not applicable.

Solubility(ies)
Completely miscible with water @ °C Miscible with water.

Partition coefficient
log Pow: -1.57 pH7 @ 20°C. Model calculation
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

Auto-ignition temperature
Scientifically unjustified.

Decomposition Temperature
No information available.

Explosive properties
Not explosive EU Method A.14 ( Explosive properties)

Oxidising properties
The mixture is not classified as oxidising at this concentration, however it would still show oxidising properties.

9.2. Other information
Other information
All available information has been included in section 9.1.

SECTION 10: Stability and reactivity

10.1. Reactivity
Reactivity
Can act as an oxidising agent and be reactive.

10.2. Chemical stability
Stability
Stable under normal conditions. Thermal decomposition can occur.

10.3. Possibility of hazardous reactions
Possibility of hazardous reactions
May react vigorously or exothermically. Reactions in a sealed container may result in pressure build up with possible rupture of the container. May react explosively. Release of oxygen may support combustion. Will not polymerise.

10.4. Conditions to avoid
Conditions to avoid
Avoid heat, direct sunlight and moisture. Avoid storage with incompatible materials. Avoid storage in freezing conditions. Avoid storage near to unprotected drainage systems. It is advisable to store the product within some form of containment to prevent spillages reaching drainage systems. Do not allow the storage container to be left exposed to the atmosphere. Avoid storage in an unstable manner or in a situation that would result in exposure to the product.

10.5. Incompatible materials
Materials to avoid

10.6. Hazardous decomposition products
Hazardous decomposition products
See section 5 for thermal decomposition products.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Toxicological effects
The mixture has not been tested for toxicological properties, information is provided for relevant constituent substances where available as included in section 3.2. References have been taken from the ECHA website, List of Registered Substances - Toxicological Information.

Acute toxicity - oral
Notes (oral LD₅₀)
US EPA Guidelines

ATE oral (mg/kg)
9,090.91

Acute toxicity - dermal
Notes (dermal LD₅₀)
US EPA Guidelines

Acute toxicity - inhalation
Notes (inhalation LC₅₀)
Hydrogen peroxide 50% w/w solution. US EPA Guidelines
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

ATE inhalation (gases ppm) 81,818.18
ATE inhalation (vapours mg/l) 200.0
ATE inhalation (dusts/mists mg/l) 27.27

Skin corrosion/irritation
Animal data Dose: 0.5ml of 35% w/w solution, 4 hours, Rabbit Primary dermal irritation index: 1.6 (mean) 4 hour exposure, 14 day observation period. Moderately irritating.

Serious eye damage/irritation
Tests on rabbits, OECD Guideline 405, Acute eye Irritation / Corrosion. Extremely irritating; 10% w/w solution.

Skin sensitisation
No reliable information.

Germ cell mutagenicity
Gene mutation:: Positive without metabolic activation. OECD Guideline 476 (In vitro Mammalian Cell Gene Mutation Test). Hydrogen peroxide has the potential to induce mutations in mammalian cells.

Chromosome aberration: Negative. OECD Guideline 474. 35% solution. No genotoxicity under the conditions of the test. Intraperitoneal route.

Carcinogenicity
Scientifically unjustified.

Reproductive toxicity
Scientifically unjustified. No adverse effects to reproduction

Reproductive toxicity - development
Scientifically unjustified. Not toxic to reproductive development.

Specific target organ toxicity - single exposure
STOT - single exposure No information available.

Specific target organ toxicity - repeated exposure
STOT - repeated exposure Industry - Dermal; Long term systemic effects 22 mg/kg/day 2.03 (NOEL) ppmV/6hr/day, Inhalation, Rat OECD 412 (Repeated dose Inhalation Toxicity: 28/14 day) Respiratory tract irritant

Inhalation Vapours or mists will irritate the nose, throat and respiratory tract. Coughing and difficulties in breathing. Severe exposure may cause pulmonary oedema and bronchitis.

Ingestion Irritating. Symptoms following overexposure may include the following: Nausea, vomiting. Stomach pain.

Skin contact Bleaching of the skin May irritate the skin.

Eye contact Irritating to eyes. Lacrimation. Conjunctivitis may develop.

SECTION 12: Ecological Information

Ecotoxicity The following information refers to hydrogen peroxide in general.
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

12.1. Toxicity

Acute toxicity - fish
LC₅₀, 96 hours: 16.4 mg/l, Pimephales promelas (Fat-head Minnow)
Freshwater, semi-static.

Acute toxicity - aquatic invertebrates
NOEC, 48 hours: 1 mg/l,
Daphnia pulex, semi-static, freshwater.

Acute toxicity - aquatic plants
EC₅₀, 72 hours: 1.38 mg/l,
Static, saltwater, Skeletonema costatum.
Growth rate test.

Acute toxicity - microorganisms
EC₅₀, 3 hours: > 1000 mg/l, Activated sludge
OECD Guideline 209: Activated Sludge, Respiration Inhibition Test.

Acute toxicity - terrestrial
Scientifically unjustified.

Chronic toxicity - fish early life stage
Scientifically unjustified.

Short term toxicity - embryo and sac fry stages
NOEC, : 500 ppm ,
Salmo trutta
Sac fry, 45 min exposure, static.

Chronic toxicity - aquatic invertebrates
NOEC, 21 days: 0.63 mg/l, Daphnia magna
Freshwater, flow through.

Toxicity to terrestrial plants
Scientifically unjustified.

12.2. Persistence and degradability

Phototransformation
Not available.
No reliable information

Stability (hydrolysis)
Scientifically unjustified.

Biodegradation
Water - Degradation (%) 99%:  30 min.
OECD Guideline 209: Activated Sludge, Respiration Inhibition Test.
Aerobic; activated sludge, domestic.
30% solution.

Biological oxygen demand
Not available.

Chemical oxygen demand
Not available.

12.3. Bioaccumulative potential

Bioaccumulative potential
Study scientifically unjustifiable.

Partition coefficient
log Pow: -1.57 pH7 @ 20°C. Model calculation

12.4. Mobility In soil

Adsorption/desorption coefficient
Scientifically unjustified.

Henry's law constant
0.00075 Pa m3/mol @ @ 20°C

Surface tension
73.41 mN/m @ @ 20°C 17.05% w/w solution

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB assessment
This substance is not classified as PBT or vPvB according to current EU criteria.

12.6. Other adverse effects
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

Other adverse effects
Will affect drinking water supplies.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

General information
Any waste material is classed as hazardous waste, it should only be disposed of through licenced waste handlers and treatment sites. Do not allow unauthorised disposal to the environment. If operators are exposed to vapours during the disposal process then suitable respiratory protection should be worn. All other personal protective equipment as described in section 8 should be worn.

Disposal methods
Uncleaned empty containers should be treated as hazardous waste. Avoid unauthorised disposal. Do not dump illegally onto land or into water. When dealing with waste always consider the waste management hierarchy of Prevention, Preparation for re-use, Recycling, Recovery and Disposal. It is advisable to minimise waste at source if possible, then re-use, recover or recycle wherever possible before considering waste disposal options. Small amounts (<500ml) can be flushed to drain with plenty of water. Large amounts should be sent for disposal through a reputable hazardous waste company.

SECTION 14: Transport information

14.1. UN number
Not classified.

14.2. UN proper shipping name
Not applicable.

14.3. Transport hazard class(es)
Not applicable.

14.4. Packing group
Not applicable.

14.5. Environmental hazards
Environmentally hazardous substance/marine pollutant
No.

14.6. Special precautions for user
Not applicable.

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations
HYDROGEN PEROXIDE 20 VOL (6% w/v) LRG

EU legislation

Guidance

Workplace Exposure Limits EH40.
ECHA Guidance on the compilation of safety data sheets 2014.

15.2. Chemical safety assessment

Information from the manufacturer of the raw material has not been received regarding Chemical Safety Assessments, Exposure Scenarios or a Chemical Safety Report.

SECTION 16: Other information

General information

This datasheet is not intended to be a replacement for a full risk assessment, these should always be carried out by competent persons. Toxicological and ecotoxicological information has been taken from the ECHA website of registered substances.

Key literature references and sources for data

Raw material safety data sheets. ECHA website. Health Protection Agency Information.
